CLAIMS 1-8, 10-21, 23-25 AND 27-34 ARE PENDING

- 1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 2. Applicant's arguments with respect to claims 1-8, 10-21, 23-25 and 27-34 have been considered but are moot in view of the new ground(s) of rejection.
- 3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5, 8, 11-18, 21, 24, 25 and 27-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Beckwith et al (Beckwith), US 6,330,598, 11 December 2001.

Beckwith is directed to the global management of an intelligent network, which thus comprises a distributed data processing system including a network, a plurality of clients connected to the network, and servers connected to the network [FIG 1].

Application/Control Number: 09/884,490

Art Unit: 2161

As to **claim 11**, Beckwith allows users to submit requests that can specify or modify stored information in the form of parameters for a subscribed-to service including deletion of a portion of the service from some area codes [COL 3 lines 29-40]. The user may communicate with a browser and thus via Web pages [FIG 1]. Such an update corresponds to discarding a portion of the stored information.

Beckwith teaches the claimed invention at another level as well, whereby a user can withdraw an update request message before it is applied, in which case it is deleted [COL 5 lines 10-22].

As to **claim 1**, executing an update request is clearly a (business) transaction, and a cancellation of it corresponds to selecting information that is no longer required for the transaction. Alternately, any update that removes information from a service at the request of a user corresponds to removal of a portion of the service information.

These transactions are treated in more detail in FIG 5B-8B and associated discussions.

As to **claim 2**, the core system of Beckwith checks request messages for validity and responds to the possibilities [COL 4 line 51 to COL 5 line 21]. As to **claim 3**, Beckwith also checks for validity in the in the sense of authorized access involving a certificate, pass code, and the like [COL 16 lines 9-21]. Such information is clearly personal information in the sense of **claims 4-5**.

The elements of claims 8, 12-18, 21, 24, 25 and 27-34 are rejected in the analysis above and these claims are rejected on that basis.

Application/Control Number: 09/884,490 Page 4

Art Unit: 2161

4. Claims 6, 7, 10, 19, 20 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beckwith et al (Beckwith), US 6,330,598, 11 December 2001.

Beckwith does not explicitly state that the transactions involve credit card numbers or applets. **Official Notice** is taken that transactions in global service managements systems involved credit card transactions at the time of the invention. **Official Notice** is taken that some transactions that were made with browsers at the time of the invention involved applets. **It would have been obvious** to one of ordinary skill in the art at the time of the invention to provide for these functionalities in Beckwith because failure to do so would cause undue limitations in the application of a system intended to be a global. Both of these improvements were well within the purview of one of ordinary skill at the time of the invention.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wayne Amsbury whose telephone number is 571-272-4015. The examiner can normally be reached on M-F 6-18:30 FIRST WEEK.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Safet Metjahic can be reached on 571-272-4023. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
